RAILWAYS WITHIN 10 KM

No

AIRPORT WITHIN 50 KM

Yes

TYPE OF USE

Site for production and warehouses - small-scale production and production services. Mixed-use residential development

Brief description

The site is currently used as arable land. It is located on the north-east edge of the village. The zoning plan subdivides the site into a part zoned for production and warehouses (approx. 3 ha) and a part zoned for mixed-use residential development (3.5 ha). Development in the latter part is restricted because access to the technical infrastructure corridor must be maintained.
